

Case Reports Checklist for *Headache*

You must report the page number in your manuscript where you consider each of the items listed in this checklist. If you have not included this information either revise your manuscript accordingly before submitting or note N/A inside the brackets [].

Section	Item No.	Descriptor	Page #
Abstract	1	Rationale why case is important, main outcome or clinical lesson	[]
Introduction	2	Clinical or scientific relevance of the case (e.g., rare disorder; new disorder; novel symptom presentation, diagnostic procedure, treatment; unexpected outcome; adverse effect; myth exploded; new association or implications for pathogenesis)	[]
Case	3	a. Demographic, medical and psychiatric history	[]
		b. ICHD-II diagnosis	[]
		c. Headache frequency, chronicity (if relevant)	[]
		d. Objective findings (if relevant)	[]
		e. Treatment regimen, titration, duration of treatment, benefits, adverse effects, etc. (if relevant)	[]
Discussion	4	Learning points or clinical lesson	[]
References	5	Relevant research cited	[]
Figure captions	6	If relevant	[]
Other	7	a. Patient informed consent	[]
		b. Conflicts of interest	[]
		c. Acknowledgements	[]

Patient Confidentiality

It is a condition of submission of a case report (Brief Communication/Clinical Note) to *Headache* that you have first obtained the patient's, or patient's guardian's, explicit consent. This consent *must* be signed, not verbal. In the event of a complaint you will be asked to produce documentary evidence of this consent. You *do not* need to include the patient consent signature with your submission.

If a patient cannot be traced, you must consult the *Headache* editorial office before continuing with submission. Publication of such a case report may require complete anonymization, including the

removal of the authors names and their institutions.

If the patient has died, then consent for publication must be sought from the next of kin of the patient.

STOP: if you have not obtained signed consent you must discontinue manuscript submission. Submission of a case report to *Headache* implies you have understood this prerequisite and have obtained signed consent from the patient(s), patient's guardian or next of kin. Failure to comply with policy as stated in the American Headache Society Journal Policy Guidelines will be considered serious misconduct.

Once you have completed this checklist, please save a copy and upload it as part of your submission. When requested to do so as part of the upload process, please select the file type: *Checklist*. You will NOT be able to proceed with submission unless the checklist has been uploaded. Please DO NOT include this checklist as part of the main manuscript document. It must be uploaded as a separate file.
