Welcome to the June 2016 issue of our EQUATOR Oncology Project Current Awareness Bulletin.

We hope that this bulletin will help to keep you up-to-date with the latest issues in the reporting and methods in oncology research by highlighting links to interesting research papers, editorials, comments and other resources related to cancer research. Topics covered in this issue include: Statistical issues, adverse events, patient-reported outcomes and early phase trials.

The EQUATOR Oncology Project welcomes your feedback and involvement! Please share your comments about the Project and any problems you have encountered in the planning or reporting of cancer research with project lead Angela MacCarthy: angela.maccarthy@ndorms.ox.ac.uk.

The bulletin is a work in progress - look out for changes over the coming issues!

Please feel free to pass this bulletin on to colleagues.

With best wishes from the EQUATOR Oncology Project Team

**Statistical issues**

Saad ED, Buyse M. Statistical controversies in clinical research: end points other than overall survival are vital for regulatory approval of anticancer agents. Ann Oncol. 2016;27(3):373-378. PMID: 26578738

**Adverse events**

**Patient-reported outcomes**

End points

Early phase trials
