Who we are
We promote excellent writing and the use of reporting guidelines by raising awareness, delivering training and creating resources.

Our goal
Every research article should be a clear and complete account of the research undertaken. Everyone should be able to understand and use the information in research articles without having to make assumptions, decipher jargon, or speak to the authors.

Reporting guidelines
These tools for authors of research articles help you to include every detail your readers need to understand and use your research.

EQUATOR NETWORK
Ten years of improving the health research literature
Jennifer A de Beyer, Iveta Simera, Angela MacCarthy, Caroline Struthers, Shona Kirtley, Gary S Collins, Doug G Altman
1 UK EQUATOR Centre, Centre for Statistics in Medicine, University of Oxford, UK
